

# 4<sup>th</sup> DST-SERB School on CHEMICAL ECOLOGY

8<sup>th</sup>-22<sup>nd</sup>  
July 2023

The Centre for Ecological Sciences, Indian Institute of Science, Bangalore, in association with the Science and Engineering Research Board, a statutory body of the Department of Science and Technology, Government of India, is organising the fourth DST-SERB School in Chemical Ecology between the 8<sup>th</sup> and 22<sup>nd</sup> of July, 2023.

Chemical ecology is a multidisciplinary research area that has potential applications in bioprospecting, medical research, sustainable agriculture and integrated pest management. This intensive two-week-long course will provide an insight into state-of-the-art research areas of Chemical Ecology, with a special emphasis on venoms and poisons, and plant-animal interactions.

Twenty-five young researchers, including master's students, PhD scholars, postdoctoral fellows and young faculty members, will be selected. The workshop will consist of invited scientific talks from eminent Indian and international scientists, poster sessions, group discussions, hands-on training and field visits.
